## PREMIUM HEVC ENCODER OVER BONDED CELLULAR NETWORKS

The PRO3 Series is our flagship mobile video encoder & transmitter solution designed for live video producers and news gathering professionals looking for contribution performance from any location around the world.

With its large set of professional audio and video interfaces, the PRO3 Series supports the best state-of-the-art H.265/HEVC hardware encoder by offering premium video quality with less data usage, and low end-to-end latency (down to 0.5 sec). The widely adopted H.264/AVC video format is supported as well for compliancy with deployed infrastructures.

The solution features multiple world-wide compliant embedded cellular modems with high efficiency patented custom antenna array: up to x6 3G/4G/5G or x8 3G/4G modems. For strengthening the signal transmission in critical environment, the PRO3 Series can be also combined with external AVIWEST's QUAD Antenna (passive antennas) or AVIWEST's QUAD CellLink (active 3G/4G active antennas). Additional links such as built-in Wi-Fi and Dual Gigabit Ethernet for streaming over LAN/WAN, BGAN, GX or Ka band Satellite are also natively supported.

With its high versatility and low consumption (up to 4 hours with external battery), the PRO3 Series is the ideal companion for on-the-go video professionals that need robust and reliable solution, with the ultimate performance and picture quality.

### SIMPLE

The PRO3 Series has been designed with ease-of-use in mind, the user-friendly intuitive interface allows broadcasting live videos in 2 touch screen taps.

### VERSATILE

Available in a compact ruggedized enclosure, the PRO3 Series offers standard V-Mount or Gold-Mount plate for direct mounting on professional cameras, but also comes with in a smart designed & compact backpack.

### HIGH PERFORMANCE

By implementing the best state-of-the-art H.265/HEVC hardware encoder in a compact design enclosure, the PRO3 Series enables video professionals to provide seamless high quality news and event coverage.

### ANY NETWORKS

Leveraging Emmy® award winning AVIWEST's SST protocol, an intelligent IP bonding stack and powerful contribution network protocols, the PRO3 Series ensures the delivery of live video even in the midst of unpredictable and unmanaged network conditions.

# MAIN FUNCTIONS

## LIVE & AUTO-RECORD

Broadcast premium quality video live over bonded IP networks : 3G/4G/5G, Ethernet, Wi-Fi, and satellite networks such as BGAN, GX and Ka Band. Combined with the automatic record feature, you can simultaneously record this live on the pluggable SD card with different resolution and bitrate to ensure an optimal and constant video quality.

## REC & PROGRESSIVE FWD

Record broadcast-grade quality video on the SD card, and optimize your time by forwarding the file progressively whereas the record is still in progress. This forward approach enables fast and error-free video delivery.

## DATA HOTSPOT

By leveraging the transmitter's aggregated networks connections, switch the unit to behave as a mobile router in order to benefit a high speed internet connection from anywhere.

## IFB & VIDEO RETURN

Ensure two-ways audio communication between the producer, production crews & on-air talent thanks to a seamless and robust intercom. Receive and watch high quality HD feed from the Studio during live sessions or when the device is idled. With sub second latency delivery, it is especially designed for receiving on-air program, teleprompting information or ensuring confidence monitoring from the field.
